

Chequamegon Bay Watershed Site Conservation Program

Restoration Plan Database: Crystal Reports of Individual Plan Summaries

I. BASIC PLAN DATA

Plan name:

Chequamegon Bay Watershed Site Conservation Program

Brief description of plan:

Located in Northern Wisconsin on Lake Superior, the Chequamegon Bay Watershed Site encompasses two large and numerous small watersheds, and covers three counties. Conservation targets for the Program have been identified and one of the four target systems is the Kakagon and Bad River Sloughs. Considered Wisconsin's Everglades and covering 16,000 acres, the Slough system is the largest undeveloped system in the upper Great Lakes.

Region the plan is located within:

Great Lakes Region

Watershed(s) included within the plan:

L014x , L015x

Area plan covers (in square miles):

25.00 square miles

Plan scale:

Multi-county

Plan's lead organization(s):

The Nature Conservancy

Plan's Main Contact Information:

10/17/2004

On-line version of plan:

Date of original plan:

10/2000

II. TECHNICAL INFORMATION

Plan includes restoration goals: Y

Level of detail of the goals:

G

Summary of the goals:

Goals for the Slough include maintaining the integrity and diversity of natural communities within the system, maintaining the natural processes of the slough's system, including lake level fluctuations, flooding, ground water recharge and water quality, controlling aggressive exotic species and increasing forest cover within the watershed to reduce indirect stresses.

Plan recommends restoration of specific project sites:

Y

Plan includes a discussion of funding sources:

Y

Plan addresses long-term protection of restored sites:

Y

Partners included in developing the plan:

Federal
State
Local
Tribes
Non-profit Organizations
Academia

Type(s) of public outreach included during plan development:

Held public workshops, meetings, open house, or scoping meetings
Kept a contact list of interested parties
Mailed or e-mailed information to a contact list
Distributed brochures or other materials
Conducted surveys
Formed an advisory group(s)

Plan includes public outreach as part of plan implementation (e.g. annual public meeting, local group participation):

N

Plan discusses the application of innovative approaches to restoration:

N

Plan make use of GIS mapping capabilities:

N

Plan addresses monitoring/reference sites for ecosystem level monitoring (baseline conditions) by:

Plan addresses monitoring/reference sites for project level monitoring by:

S

The plan discusses or coordinates with other restoration plans covering the same geographic area:

N

Other plan names:

Plan contains detailed information on historic and/or current habitat size, rate of loss, acres restored or protected, etc.):
